### Projects and Automation

Automation of industrial processes.

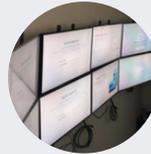

protection and monitoring.

### Remote Process Control and Monitoring

Use of IoT Technologies for Process Automation (or Internet of Things).

### Access Control

Solutions to manage and restrict access to facilities.

### Facilities and Installations - Lighting

Design and installation of efficient lighting, water, gas and air conditioning systems.

### Fire Detection

Early warning systems for fire protection.

### Communications and Certifications - Voice and Data Networks

Implementation of robust communication infrastructures.

### Systems Maintenance

Continuous support and service for CCTV Fire Detection, Access Control, Electrical Networks and Lighting.

### Energy Saving

Technologies to optimize energy consumption.

### BMS - Integrated Building Automation System

Unification of CCTV Services, Access Control, Fire Detection, Electrical Networks and Lighting including Energy Saving.

## SPECIAL PROJECTS

### Special Projects - Fiber Optic Installation and Structured Cabling

Advanced and structured communications.

### Special Projects - Supply and Installation of Feeders

Comprehensive monitoring and security.

### Special Projects - Production Line Project

design and deployment of efficient production lines.

### Air Management System and MTO

Class 10,000 and Class 100,000 clean rooms for industry / chilled water generating units, cooling towers

## CERTIFICATIONS

## SUBSTATION SERVICES

### Installation of Medium and Low Voltage Networks

Deployment of electrical infrastructure.

### Engineering and Services in Electrical Networks and Substations

Maintenance and Support for Electrical Networks and Substations.

### Role and Monitoring - Rich Distribution Networks

olutions for efficient energy distribution.

### Communications and Certifications- HikVision Certification

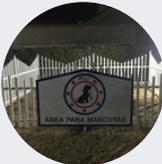

Security Associate Certification

### Communications and Certifications- Panduit Certification

Quality assurance on Panduit-certified networks.

## MAINTENANCE AND OTHER SERVICES

### Manufacturing and Installation of Perimeter Fence

Specialized perimeter security.

### Electrical Networks and Lighting

Design and deployment of safe and efficient electrical networks.

### Construction Works

Physical infrastructure development.

### Maneuvers and Installations

Design and deployment of safe and efficient electrical networks.
