ZENDATA

Solutions

ZENDATA GATEWAY

ZENDATAGATEWAY - Server Control

ZendataGateway is a tool designed for efficient server management. This solution provides secure connectivity with the integration of protocols such as MQTT and Modbus TCP, offering detailed and precise control.

ZENTRACK

Localization and traceability

It includes localization/traceability using RFID and IoT technologies with standard protocols and open source. System Security and Scalability: Hosting on exclusive servers with a scalable system compatible with pre-existing databases.

ZENP.M

ZEN - Power Monitor

The comprehensive solution for advanced monitoring of electrical systems. Focused on motor power consumption and proactive fault detection. Ensures energy efficiency with accurate diagnostics and real-time analysis through a dashboard for informed decisions.

ZENIOT

ZEN - IoT

Zen IOT redefines administration by allowing remote access through a WiFi connection. Obtaining real-time information and optimizing performance with the ability to connect and manage. ZEN LM provides a technical and secure solution for integrating data and advanced analysis in a dashboard.

ZENVISION

CCTV Closed Circuit Television

Video surveillance systems that use security cameras to capture images and videos in real time. These images are transmitted and recorded in a private and controlled location, which allows for the supervision and monitoring of different spaces, both public and private.

ZENCloud

Information Gathering

Powerful and versatile tool designed to facilitate the collection of information from the field and its subsequent sending to centralized systems, such as data analytics systems or other third-party systems.

Solutions

MATEA

Telemetric monitoring and analysis of equipment

Control of industrial equipment, pumps, compressors, levels, pressures, flow, alerts for equipment failure, intrusion to remote sites, enabling remote access, cloud event logging and analytics.

BMSandnc

BMSync

Building management system, CCTV system integration, access, fire detection, lighting, HVAC.
